

UI/UX & WEB DESIGN COURSE

Updated Faculty Allocation and Lecture Structure

Course Structure

Lecture Duration: 2 Hours per Lecture

Teaching Days: Monday to Friday

Total Lectures: 90

Total Teaching Hours: 180 Hours

Total Duration Required: 18 Teaching Weeks

REVISED FACULTY ALLOCATION

Lecturer	Responsibility	Lectures	Teaching Hours
Qutbuddin	Basic Figma + CorelDRAW	9	18 Hours
Ayaan	UI/UX Foundations, Advanced Figma, Animation, WordPress, Wix Studio, Shopify, Responsive Design, Portfolio and Final Projects	81	162 Hours
Total	Complete Course	90	180 Hours

FACULTY RESPONSIBILITIES

QUTBUDDIN

Qutbuddin will handle two specific areas of the course:

1. Basic Figma

Qutbuddin will begin the complete course and introduce students to Figma.

His responsibility will be to ensure that every student understands the basic software tools and can create simple layouts before moving to advanced UI/UX work.

He will cover:

- Figma interface
- Figma workspace
- Pages and files
- Frames
- Layers
- Basic shapes
- Text tools
- Colors
- Images
- Buttons
- Icons
- Basic components
- Basic Auto Layout
- Basic constraints
- Simple wireframes

Qutbuddin will not cover:

- Advanced prototyping
- Smart Animate
- Advanced animation
- Micro-interactions
- Interactive components
- Complex responsive systems
- Advanced design systems

These topics will be handled by Ayaan.

2. CorelDRAW

Qutbuddin will also handle the complete CorelDRAW module.

He will cover:

- CorelDRAW interface
 - Basic tools
 - Shapes and objects
 - Icons
 - UI elements
 - Logo design basics
 - Posters and banners
 - Exporting assets for websites
-

AYAAN

After Qutbuddin completes the basic Figma introduction, Ayaan will take responsibility for the complete professional learning journey.

Ayaan will cover:

- UI/UX Foundations
- Understanding users
- User journeys
- User flows
- Wireframing principles
- Layout and grids
- Typography
- Color theory
- Advanced Figma
- Advanced Auto Layout
- Prototyping
- Interactions
- Animation
- Smart Animate
- Micro-interactions
- WordPress
- Elementor
- Advanced WordPress
- WooCommerce
- Wix Studio

- Shopify
 - Responsive Design
 - Accessibility
 - Portfolio Development
 - Case Studies
 - Final Real-World Projects
-

WEEK 1 — FIGMA BASICS

Faculty: Qutbuddin

The course will officially begin with Qutbuddin.

The objective of the first week is to make students comfortable with Figma before introducing them to detailed UI/UX theory and advanced design techniques.

LECTURE 1 — INTRODUCTION TO FIGMA

Lecturer: Qutbuddin

Duration: 2 Hours

Topics

- Introduction to Figma
- What Figma is used for
- Role of Figma in UI/UX design
- Creating a Figma account
- Understanding the Figma dashboard
- Creating a new design file
- Understanding the Figma workspace
- Toolbar
- Layers panel
- Assets panel
- Properties panel
- Zooming and navigation
- Selection tools

Practical Activity

Students will:

- Create their first Figma file
- Create a page
- Create desktop and mobile frames
- Understand the basic workspace

Learning Outcome

By the end of the lecture, students should be comfortable navigating the Figma interface.

LECTURE 2 — BASIC DESIGN TOOLS

Lecturer: Outbuddin

Duration: 2 Hours

Topics

- Frames
- Rectangles
- Circles
- Lines
- Basic shapes
- Text tool
- Font size
- Font weight
- Text alignment
- Colors
- Fills
- Borders
- Corner radius
- Shadows
- Basic effects
- Importing images

Practical Activity

Students will create:

- Simple cards
- Buttons
- Text sections
- Basic visual elements

Learning Outcome

Students should be able to independently create basic UI elements.

LECTURE 3 — BUTTONS, ICONS AND BASIC COMPONENTS

Lecturer: Qutbuddin

Duration: 2 Hours

Topics

- Creating buttons
- Creating basic icons
- Working with images
- Organizing layers
- Naming layers properly
- Grouping elements
- Introduction to components
- Creating basic reusable components
- Understanding component instances

Practical Activity

Students will create:

- Primary button
- Secondary button
- Basic navigation item
- Card component
- Simple UI kit

Learning Outcome

Students should understand how reusable design elements work in Figma.

LECTURE 4 — BASIC AUTO LAYOUT, FRAMES AND CONSTRAINTS

Lecturer: Qutbuddin

Duration: 2 Hours

Topics

- Understanding frames
- Desktop frames
- Tablet frames
- Mobile frames
- Introduction to Auto Layout
- Horizontal Auto Layout
- Vertical Auto Layout
- Spacing between elements
- Basic padding
- Basic alignment
- Introduction to constraints

Practical Activity

Students will create:

- Navigation bar
- Simple card layout
- Button group
- Basic responsive section

Learning Outcome

Students should understand the basic structure required before learning advanced responsive UI design.

LECTURE 5 — BASIC WEBSITE WIREFRAME AND FIGMA ASSIGNMENT

Lecturer: Outbuddin

Duration: 2 Hours

Topics

- Understanding basic website structure
- Header
- Navigation
- Hero section
- Content section
- Cards
- CTA section
- Footer
- Organizing a complete Figma file
- Layer naming
- Basic spacing
- Basic alignment

Practical Assignment

Students will create a simple website homepage containing:

- Header
- Hero section
- Content section
- Cards
- Call-to-action section
- Footer

Week 1 Outcome

At the end of Week 1, every student should be able to:

- Navigate Figma independently
- Use basic design tools
- Create shapes and text
- Work with colors and images
- Create buttons and icons

- Create basic components
 - Use basic Auto Layout
 - Understand basic constraints
 - Create a simple homepage wireframe
-

WEEK 1 FACULTY SUMMARY

Lecture	Topic	Lecturer
1	Introduction to Figma	Qutbuddin
2	Basic Design Tools	Qutbuddin
3	Buttons, Icons and Components	Qutbuddin
4	Basic Auto Layout, Frames and Constraints	Qutbuddin
5	Basic Website Wireframe and Assignment	Qutbuddin

Qutbuddin Week 1 Workload

Lectures: 5

Teaching Hours: 10 Hours

WEEK 2 — UI/UX FOUNDATIONS

Faculty: Ayaan

After students understand the Figma software, Ayaan will begin the UI/UX design fundamentals.

This sequence is recommended because students will already know how to use the basic design tool and can therefore apply UI/UX concepts practically during lectures.

LECTURE 6 — INTRODUCTION TO UI AND UX

Topics

- What is UI Design?
- What is UX Design?

- Difference between UI and UX
 - Role of a UI/UX Designer
 - UI/UX design process
 - Examples of good and bad user experience
-

LECTURE 7 — UNDERSTANDING USERS

Topics

- Understanding target users
 - Identifying user needs
 - Identifying user problems
 - Introduction to user research
 - User personas
 - User behavior
-

LECTURE 8 — USER FLOW AND JOURNEY MAPPING

Topics

- What is a user flow?
- Entry points
- User actions
- Decision points
- Journey mapping
- Identifying user pain points

Practical Activity

Students will create a basic user flow in Figma.

LECTURE 9 — WIREFRAMING AND INFORMATION STRUCTURE

Topics

- Purpose of wireframing
- Low-fidelity wireframes

- Information hierarchy
- Content placement
- Website structure
- Screen planning

Practical Activity

Students will improve the basic wireframe created during Week 1 using proper UX principles.

LECTURE 10 — LAYOUT, GRID, SPACING, TYPOGRAPHY AND COLOR

Topics

- Layout principles
- Alignment
- White space
- Margins
- Padding
- Grid systems
- Typography
- Font hierarchy
- Color principles
- Contrast
- Visual hierarchy

Week 2 Outcome

Students should now understand both:

How to use Figma

and

Why interfaces should be designed in a particular way

WEEK 3 — ADVANCED FIGMA, PROTOTYPING AND ANIMATION

Faculty: Ayaan

Ayaan will now take students from basic Figma knowledge to advanced professional-level Figma work.

LECTURE 11 — ADVANCED AUTO LAYOUT

Topics

- Advanced Auto Layout
 - Nested Auto Layout
 - Hug contents
 - Fill container
 - Fixed dimensions
 - Advanced spacing systems
 - Responsive card systems
-

LECTURE 12 — ADVANCED COMPONENTS AND VARIANTS

Topics

- Component architecture
 - Component properties
 - Variants
 - States
 - Reusable systems
 - Button states
 - Input states
 - Menu states
-

LECTURE 13 — RESPONSIVE DESIGN IN FIGMA

Topics

- Responsive frames
 - Advanced constraints
 - Desktop to tablet adaptation
 - Tablet to mobile adaptation
 - Responsive components
 - Flexible layout systems
-

LECTURE 14 — PROTOTYPING AND INTERACTIONS

Topics

- Connecting screens
 - Prototype flows
 - Triggers
 - Actions
 - Click interactions
 - Hover interactions
 - Overlays
 - Navigation
 - Transitions
-

LECTURE 15 — ADVANCED ANIMATION AND SMART ANIMATE

Topics

- Smart Animate
- Interactive components
- Micro-interactions
- Button animation
- Menu animation
- Card animation
- Page transitions
- Loading animations

- Presenting prototypes

Practical Project

Students will create an interactive web or app prototype containing animations and transitions.

REVISED FIGMA RESPONSIBILITY

QUTBUDDIN — BASIC FIGMA

Lectures 1–5

Qutbuddin completes:

- Interface
 - Tools
 - Shapes
 - Typography tools
 - Colors
 - Buttons
 - Icons
 - Basic components
 - Basic Auto Layout
 - Basic constraints
 - Simple wireframes
-

AYAAN — ADVANCED FIGMA

Lectures 11–15

Ayaan completes:

- Advanced Auto Layout
- Advanced components
- Variants
- Responsive systems
- Prototype flows
- Interactions

- Smart Animate
 - Advanced animation
 - Micro-interactions
-

WEEKS 4–12 — AYAAN

All WordPress, WooCommerce, Wix Studio and Shopify topics will continue under Ayaan.

The lecture numbers will continue as follows:

WordPress Basics

Lectures 16–25

Elementor and Advanced WordPress

Lectures 26–35

WordPress SEO, Optimization and WooCommerce

Lectures 36–45

Wix Studio

Lectures 46–55

Shopify

Lectures 56–65

WEEK 14 — CORELDRAW FOR WEB DESIGNERS

Faculty: Qutbuddin

The complete CorelDRAW module will be handled by Qutbuddin.

Total Lectures: 5

Total Hours: 10 Hours

LECTURE 66 — CORELDRAW INTERFACE AND BASIC TOOLS

Topics

- Introduction to CorelDRAW
- Understanding the interface
- Property bar
- Toolbox
- Pages
- Layers
- Selection tools
- Shape tools
- Basic object manipulation

Practical Activity

Students will create and organize basic vector objects.

LECTURE 67 — SHAPES, ICONS AND UI ELEMENTS

Topics

- Working with shapes
- Pen and curve tools
- Basic vector drawing
- Combining objects
- Creating icons
- Creating buttons
- Creating basic UI elements

Practical Activity

Students will create a simple icon and UI asset set.

LECTURE 68 — LOGO DESIGN BASICS

Topics

- Introduction to logo design
- Logo types

- Shape construction
- Typography in logos
- Color selection
- Basic brand consistency

Practical Activity

Students will create a simple brand logo.

LECTURE 69 — POSTERS AND BANNERS

Topics

- Poster structure
- Banner structure
- Typography hierarchy
- Image placement
- Alignment
- Color balance
- Export preparation

Practical Activity

Students will create one promotional design.

LECTURE 70 — EXPORTING ASSETS FOR WEB

Topics

- Export formats
- JPG
- PNG
- SVG
- PDF
- Transparent backgrounds
- Image dimensions
- Web optimization
- Exporting icons
- Exporting logos

- Exporting website assets

Practical Assignment

Students will create and export a complete set of web-ready assets.

CORELDRAW FACULTY SUMMARY

Lecture	Topic	Lecturer
66	CorelDRAW Interface and Tools	Qutbuddin
67	Shapes, Icons and UI Elements	Qutbuddin
68	Logo Design Basics	Qutbuddin
69	Posters and Banners	Qutbuddin
70	Exporting Assets for Web	Qutbuddin

REMAINING COURSE MODULES

Lectures 71–75 — Responsive Design and Accessibility

Lecturer: Ayaan

Topics include:

- Mobile and tablet breakpoints
 - Responsive design
 - Flexbox and grid concepts
 - Browser testing
 - Accessibility
 - Performance testing
-

Lectures 76–80 — Portfolio Development

Lecturer: Ayaan

Students will create a professional portfolio website.

Lectures 81–85 — Case Study Development

Lecturer: Ayaan

Students will prepare professional UI/UX and website case studies.

Lectures 86–90 — Final Projects, Review and Presentation

Lecturer: Ayaan

Students will complete:

- Final project planning
 - Client-style projects
 - Final corrections
 - Portfolio review
 - Final presentation
-

FINAL FACULTY LECTURE COUNT

QUTBUDDIN

Figma Basics

Lectures 1–5

Total: 5 Lectures

CorelDRAW

Lectures 66–70

Total: 5 Lectures

Qutbuddin Final Total

Total Lectures: 10

Total Teaching Hours: 20 Hours

AYAAN

Ayaan will conduct all remaining lectures.

Ayaan Final Total

Total Lectures: 80

Total Teaching Hours: 160 Hours

FINAL COURSE DISTRIBUTION

Lecturer	Modules	Lectures	Hours
Qutbuddin	Basic Figma + CorelDRAW	10	20
Ayaan	All Remaining Modules	80	160
Total	Complete Course	90	180

FINAL TEACHING FLOW

Stage 1 — Qutbuddin

Basic Figma

Students first learn how to use the software.

↓

Stage 2 — Ayaan

UI/UX Foundations

Students learn the principles behind good design.

↓

Stage 3 — Ayaan

Advanced Figma + Animation

Students learn professional interaction and animation.

↓

Stage 4 — Ayaan

WordPress + Wix + Shopify

Students learn how to convert design knowledge into real websites.

↓

Stage 5 — Qutbuddin

CorelDRAW

Students learn supporting graphic and web asset creation.

↓

Stage 6 — Ayaan

Responsive Design + Portfolio + Final Projects

Students bring all skills together and create professional work.

FINAL RECOMMENDED ALLOCATION

Qutbuddin

- Week 1: Basic Figma
- Week 14: CorelDRAW
- **10 Lectures**
- **20 Hours**

Ayaan

- UI/UX Foundations
- Advanced Figma
- Animation
- WordPress
- WooCommerce
- Wix Studio
- Shopify
- Responsive Design
- Accessibility

- Portfolio
- Case Studies
- Final Projects
- **80 Lectures**
- **160 Hours**

This allocation gives each faculty member a clearly defined responsibility and prevents overlap between basic and advanced topics.
