

myCoachingOS

The Complete Management Platform for Schools & Coaching Institutes

One Platform. Every Operation. Zero Chaos.

From student enrollment to result certificates — every part of your institution, managed in one place.

What is myCoachingOS?

myCoachingOS is a cloud-based, all-in-one Institution Management System built for Indian schools and coaching institutes. Whether you run a primary school, a competitive exam coaching centre, a diploma institute, or a multi-branch education group, myCoachingOS gives you the tools, automation, and intelligence to run smarter, not harder.

Who Is It For?

- Schools — Primary, Secondary, Higher Secondary (CBSE/State Board)
- Coaching Institutes — JEE, NEET, Foundation, Competitive Exams
- Diploma & Vocational Institutes
- Tuition Centres & Ed-Tech Hybrids
- Multi-Branch Education Groups

The Problem We Solve

Most institutions manage students in Excel, fees on paper, attendance in registers, and communication over personal WhatsApp. The result is missed follow-ups, delayed payments, zero visibility, and endless manual work.

myCoachingOS replaces all of that with one smart, integrated platform that runs your institution the way it deserves to be run.

Built for India

- INR fee management with GST/tax support
- CBSE and custom grading schemes
- Aadhaar document storage
- Hindi, Marathi, Urdu, English language support
- IST timezone, Indian academic year structure
- Leaving Certificate and Bonafide Certificate as per Indian board formats

PAGE 2 — FEATURES: THE COMPLETE PICTURE

20+ Integrated Modules

Student Management

- Enrollment with roll numbers, admission dates, student profiles
- Aadhaar, birth certificate, TC, and marksheet document storage
- Custom fields for any institution-specific data
- Multi-parent/guardian profiles with dedicated parent portal
- Student promotion history — batch-to-batch and class-to-class
- Status tracking: Active, Inactive, Passed Out, Offboarded

Academic Management

- Courses, subjects, batches, and class/grade structure
- Class timetable scheduling — link rooms, teachers, and subjects
- Academic year planning with holiday calendar
- Syllabus tracking per subject and batch
- Multi-branch support — manage all branches from one login

Attendance — Manual & Biometric

- Daily schedule-wise attendance (Present / Absent / Late)
- Physical biometric device integration via real-time agent
- Auto punch-in/punch-out detection and reconciliation
- Low-attendance alerts emailed to parents and admins
- Weekly, monthly, and batch-wise attendance reports

Fee Management

- Flexible plans: one-time, monthly, quarterly, half-yearly, yearly, custom installments
- Fee categories: tuition, hostel, transport, books, uniforms, and more
- Discounts: merit, scholarship, sibling, staff, financial support

- GST/tax support — inclusive or exclusive
- Auto due-date tracking, overdue detection, and installment management
- Professional PDF receipts emailed on every payment

Exams, Assessments & Results

- Unit tests, semester exams, orals, and practicals
- Online assessments: MCQ, true/false, fill-in-the-blank, integer type, rubric
- Timed quizzes with auto-publish and auto-close
- CBSE and custom grading — percentage, CGPA, grade format
- Printable PDF marksheets with institute seal and dual signatures
- Class/batch academic rankings with composite scoring
- Subject remarks and teacher comments per student

LMS — Learning Management System

- Upload video lectures, PDFs, eBooks, audio content
- Restrict content by course, batch, branch, or class
- Students and parents access from web or mobile app
- Google Drive integration for media storage
- Live session scheduling for online classes

CRM & Admissions Management

- Full admissions pipeline: Enquiry → Follow-up → Converted
- Follow-up types: Call, Email, WhatsApp, Visit
- Counselor assignment and activity timeline per lead
- AI-powered lead scoring — Hot, Warm, Cold
- Public-facing demo/trial class booking system
- Configurable online admission form per institute

Communication & Notifications

- Bulk emails — target all students, specific batches, or individuals
- Push notifications to iOS and Android via mobile app
- In-app notifications (fee, attendance, exam, notices)
- Notices and announcements with targeted delivery by role or batch
- Real-time chat between admin, teachers, students, and parents
- Automated emails: payment receipts, attendance alerts, fee reminders, result publish

Document Generation — Print Ready

- Bonafide Certificates with institute letterhead
- Leaving / Transfer Certificates (LC/TC) as per board formats
- Custom certificate builder — borders, fonts, colors, landscape/portrait
- PDF marksheets and result reports with class rank
- Fee receipts with payment history and bifurcation
- All documents generated on-demand, from any device, in seconds

Finance & Inventory

- Expense tracking by category
- Book and uniform sales with student-wise issuance records
- Canteen sales management
- Inventory with purchase and income tracking
- P&L visibility across all operations and branches

Hostel Management

- Room allocation and occupancy tracking
- Hostel warden management
- Monthly hostel fee auto-generation for active residents
- Hostel inventory management

Transport Management

- Vehicle management (bus, van, auto)
- Route and stop configuration
- Driver and conductor assignment
- Student transport assignment
- Insurance, fitness, and permit expiry alerts

Library Management

- Book catalog with ISBN, subject, class-level tagging
- Book issuance and return tracking
- Library activity log per student

Additional Modules

- Visitor management with gate entry log
- Staff leave requests and approvals
- Staff task assignment and tracking
- Student/staff complaint management
- Configurable feedback forms
- Photo gallery with Google Drive integration
- Activities and events management
- Full audit trail — every action logged with user, IP, and timestamp

PAGE 3 — WHY CHOOSE MYCOACHINGOS

Why Schools & Coaching Institutes Choose Us

- 1. One Platform for Schools and Coaching Institutes** Most ERP systems are built for one — and force the other to compromise. myCoachingOS is architected to serve both. A school gets classes, CBSE grading, TC/LC generation, and a parent portal. A coaching institute gets batch management, CRM, installment fees, and competitive exam workflows. Both run on the same powerful engine.
- 2. AI That Actually Does Something Useful** Not marketing AI — operational AI: - Flags at-risk students before they fall behind (attendance + exam data) - Scores admission leads automatically: Hot, Warm, Cold - Forecasts fee collection revenue for the next N days - Identifies students likely to default on fee payments - Writes monthly institution reports, exam analysis, and parent progress reports - Generates exam question banks from subject content - Drafts counselor follow-up scripts for calls, WhatsApp, and email - Translates notices into Hindi, Marathi, and Urdu instantly - Answers admin questions via an institution-aware AI chatbot
- 3. Real Biometric Integration** Not a checkbox. A real Windows agent connects physically installed biometric devices to the platform over WebSocket in real time. Punch-in/out is detected, reconciled, and synced automatically — no CSV imports, no manual entry.
- 4. Mobile App for Students and Parents** Dedicated iOS and Android app. Parents get real-time attendance updates, fee reminders, result reports, and notices without calling the office. Students access their timetable, LMS content, assignments, and exam results on their phones.
- 5. Multi-Branch, Multi-Role, Fully Configurable** Manage 10 branches from a single admin dashboard. Configure exactly which features are visible to each role — Admin, Teacher/Lecturer, Student, Parent, Accountant, Counselor, Receptionist, Branch Admin. 63 granular permissions, fully customisable per institution.
- 6. Automated Operations — Runs on Its Own** - Fee reminders sent automatically before due dates - Overdue marks applied automatically at midnight - Monthly hostel and transport fees generated automatically - Attendance alerts triggered automatically for low-attendance students - Payment receipts emailed the moment a collection is recorded - Scheduled bulk communications delivered at your chosen time
- 7. Professional Documents in Seconds** Bonafide Certificates, Leaving Certificates, custom certificates, marksheets, and fee receipts — generated digitally, print-ready, with your institute’s seal, logo, and signatures. What used to take an hour now takes 10 seconds.
- 8. Enterprise Security — Standard, Not Extra** - Short-lived JWT tokens + secure refresh flow - OTP-based password reset with 10-minute expiry - Google OAuth login support - Rate limiting on every endpoint category - XSS protection, MongoDB injection prevention, Helmet headers - HTTPS enforcement with HSTS - Full activity audit log with IP tracking
- 9. Subscription Plans That Scale** Start small with a trial. Scale up as you grow. Plans define limits on students, teachers, batches, and subjects. Feature flags let you activate only the modules your institution needs — hostel, transport, library, LMS, canteen, and more.
- 10. Cloud SaaS — Zero IT Required** Nothing to install. Nothing to maintain. Hosted on the cloud with MongoDB Atlas — always available, always backed up. Your team can access it from any device, anywhere.

Competitive Comparison

Feature	myCoachingOS	Generic School ERP	Spreadsheets
Works for Schools AND Coaching	Yes	Rarely	No
AI-Powered Insights	Yes	Rarely	No
Biometric Device Integration	Yes	Sometimes	No
Mobile App (iOS + Android)	Yes	Some	No
CRM / Admissions Pipeline	Yes	No	No
Automated Fee Reminders	Yes	Partial	No
PDF Certificate & Marksheet Builder	Yes	Rarely	No
Multi-Branch Management	Yes	Paid Add-on	No
Hostel + Transport + Library	Yes	Separate modules	No
LMS + Live Sessions	Yes	Rarely	No
Configurable Per-Role Permissions	Yes	Basic	No
Affordable for Indian Institutions	Yes	Expensive	Free but costly

PAGE 4 — DO’S, DON’TS & GETTING STARTED

The Positives — Real Impact on Real Institutions

- Single source of truth — student data, fees, attendance, exams, and documents all in one place; no more mismatched files
- Parents stay informed automatically — receipts, attendance alerts, and results reach parents without any manual effort
- Faster admissions — the CRM pipeline with AI scoring means counselors always know who to call first
- Better fee collection — automated reminders and overdue detection improve collection rates without awkward conversations
- Staff accountability — activity logs, task tracking, and leave management keep every team member organized
- Data-driven leadership — dashboards for revenue, attendance, exam performance, and admissions give you real numbers at a glance
- Paperwork cut by 90% — certificates, marksheets, and receipts that took hours are now done in seconds

DO'S — BEST PRACTICES FOR SUCCESS

- Do complete the initial setup properly — add branches, courses, subjects, batches, and rooms correctly from day one; it saves major rework later
- Do configure role permissions carefully — every staff member should have only the access they need; protect sensitive fee and student data
- Do record every enquiry in the CRM — even walk-ins and phone calls; it builds your conversion data and powers AI lead scoring
- Do enable automated fee reminders — set them 3-5 days before due dates and watch collection rates improve on their own
- Do connect your biometric device — manual attendance is error-prone and time-consuming; biometric gives you zero-effort accuracy
- Do encourage parents to install the mobile app — it reduces inbound “what’s the fee balance?” and “was my child present?” calls significantly
- Do review the AI insights dashboard weekly — the at-risk student and fee-risk reports are early warning systems; act on them early
- Do use bulk communication for all official announcements — stop using personal WhatsApp for institutional notices
- Do upload high-quality seal and signature images — they appear on every official document; use clear, transparent PNGs
- Do use the LMS — even one recorded lecture per week dramatically increases perceived value for students and parents

DON'TS — WHAT TO AVOID

- Don't skip initial setup — rushing through branch, course, and batch configuration creates data gaps that are painful to fix later
- Don't share admin credentials — always create individual staff accounts with appropriate roles instead of sharing one login
- Don't collect fees outside the platform — every payment must be recorded in the system for accurate reporting and proper receipts
- Don't ignore the activity log — it's your audit trail; use it immediately if any fee discrepancy or data dispute arises
- Don't bulk-import students with dirty data — verify names, roll numbers, and contact details before importing; garbage in, garbage out
- Don't wait for problems to surface — use the AI dashboard proactively to catch fee defaulters and attendance drops before parents escalate
- Don't skip document storage — storing student Aadhaar and certificates digitally protects the institution in audits and disputes
- Don't let the LMS sit empty — even a small content library dramatically improves how students and parents perceive the institution's value
- Don't manage branches in silos — use branch analytics to compare performance and share best practices across locations

GETTING STARTED — 4 STEPS

Step 1 — Set Up Your Institution Configure your profile, branches, academic year, courses/classes, subjects, batches, and rooms. Set up roles and permissions for your team. Upload your logo, seal, and signatures.

Step 2 — Enroll Your People Add students with complete profiles and documents. Add teachers/lecturers and staff with their subject assignments and role access. Import from your existing data.

Step 3 — Go Live Day One Start marking attendance, collecting fees, scheduling classes, and managing enquiries immediately. Connect your biometric device, publish your first notice, and onboard parents to the mobile app.

Step 4 — Grow with Intelligence Review your AI insights weekly. Use the CRM to convert more admissions. Analyze exam performance to improve teaching outcomes. Watch fee collection and parent satisfaction improve automatically.
