Batch : BVOC

Batch No : 1

Audit Date : 7/8/2026

Generated : 7/9/2026

Performance Parameters

Functional Requirements	22 / 30
UI/UX	15 / 20
Code Architecture & Best Practices	10 / 20
Viva / Concept / Q&A	10 / 20
Communication	5 / 10
Grand Total	62 / 100 Grade: B

Overall Remarks

The student demonstrates good capability in delivering functional requirements and designing user interfaces, scoring well in these practical areas. However, there are significant areas for improvement in code architecture, conceptual understanding, and communication, which are foundational for advanced development. Addressing these weaknesses will lead to a more well-rounded and effective technical professional.

Feedback Points

1. Focus on improving code architecture and adhering to best practices to enhance the maintainability and scalability of your projects.
2. Dedicate more time to understanding core concepts and preparing for technical discussions to strengthen your conceptual knowledge.
3. Practice articulating your thoughts and explaining technical decisions more clearly to improve overall communication skills.
